

14/6 series made from sheet steel

► Sheet steel

for high mechanical loads,
available in blue-grey painted
finish or galvanised

► Impressive stacking ability

► Stackable

with series LF made from plastic,
14/7 series made from plastic and steel,
14/6 series made from plastic

► High stability

due to tubular stacking rim

Steel transport containers, stackable – 14/6 series

Item	Nominal measurements L x W x H (mm)	Max. load (kg)		Capacity (litre)	Order no.	
		Single	Stack

High-grade steel models, grip equipment,
special sizes and special dimensions on request

Accessories for 14/6 series made from sheet steel

Card holder DIN A5

Self-adhesive transparent plastic, for work documents and accompanying paperwork. Access opening at the top.

Item	Order no.
FLT0 14/6	8210

Fastening lid for 14/6 series

Sheet steel with painted finish. For transport by rail or road. The containers may be stacked even when lids are in place. Fastening clips can be sealed.

Item	For containers	Order no.
VD-14/6-1	14/6-1	8220
VD-14/6-2	14/6-2	8230
VD-14/6-3	14/6-3	8240

Dust cover with grip hole

Galvanised sheet steel. Recommended for in-house transport of products which need protection from dirt and dust.

Item	For containers	Unit	Order no.
SD-14/6-1 v	14/6-1	10	9320
SD-14/6-2 v	14/6-2	10	9330

Custom-made perforated containers for 14/6 and 14/7 series made from sheet steel

Advantages of the tubular-profiled stacking rim

The tubular-profiled stacking rim has a triple layered steel thickness which makes the container extremely impact-resistant. A further model is the container with folded stacking rim (double thickness).

The rim perforations on the underside ensure that cleaning agents and chemicals drain off immediately after the cleaning process and are not carried off. This ensures that the valid regulations of the 2nd Air Pollution act are fully adhered to.

Folded stacking rim

Rolled stacking rim
